PROFESSIONAL SUMMARY

Senior Backend Engineer and AI Architect with 5+ years of experience specializing in scalable microservices, AI integrations, and fintech platforms. Proven expertise in architecting end-to-end production systems, designing optimized database schemas for fault tolerance, and building high-performance data pipelines. Strong track record of integrating complex third-party APIs (payment gateways, NBFCs, ML services), deploying automated CI/CD cloud infrastructure, and driving R&D for cost optimization.

PROFESSIONAL EXPERIENCE

Big Rattle Technologies

July 2021 – Present

Senior Software Developer

Mumbai, India

- Lead the development of scalable backend systems and enterprise-grade integrations across high-impact projects in fintech, AI, and retail domains.
- Architect robust APIs, advanced database schemas, and automation pipelines designed for high-volume data processing, fault tolerance, and performance optimization.
- Establish end-to-end CI/CD pipelines and configure cloud infrastructure on GCP for automated deployment and real-time monitoring.
- Integrate a wide array of third-party APIs, including payment gateways, AI/ML services, and financial data providers.
- Spearhead R&D and feasibility analysis for new product features, focusing on technology evaluation and cost-benefit analysis.
- Implement comprehensive security automation workflows, incorporating vulnerability scanning and real-time secret detection within CI/CD pipelines.
- Define coding standards, establish technical documentation, and mentor junior developers through code reviews and pair programming.

KEY PROJECTS

- **Music Industry Data & Analytics Platform:** Engineered a high-performance backend platform using Python and FastAPI to scrape, ingest, and aggregate YouTube data. Designed analytical logic to rank top-performing artists and regional languages. Deployed the system on GCP Cloud Run and configured CloudSQL (MySQL) within a private VPC to ensure strict database isolation and security.
- **Fureelz (Video Platform & AI Integration):** Architected an end-to-end video-based social platform with advanced AI features. Built the backend infrastructure utilizing a single-region Firebase setup and REST APIs. Integrated OpenAI, Google Video Intelligence, and Vertex AI for content enhancement and moderation. Developed single-region GCP Cloud Functions for automated, event-based video processing workflows.
- **PetsApp Reels Feed Algorithm:** Designed and documented the core recommendation algorithm logic for a short-video application similar to Instagram Reels, optimizing user engagement and content discovery.
- **Fintech Payment Solutions:** Developed a comprehensive "Book Now, Pay Later" feature with end-to-end payment workflows for a travel fintech platform. Integrated NBFC APIs (Fibe, CashE, KreditBee)

for flexible financing and ICICI Lombard APIs for travel insurance, processing transactions via Razorpay.

- **Financial Data & Analytics Platform:** Created automated NSE data ingestion jobs for real-time market data processing and built a complex query builder. Developed a custom "BRT AI" library providing reusable ML utilities for specialized data processing tasks, and synchronized FMP data with OpenBB.
- **DevOps, Security & Automation:** Built an automated tracking bot using the Zoho API for timesheet management, featuring automated daily reminders. Integrated Trivy into Bitbucket pipelines for vulnerability scanning on main branch merges, and configured GitLeaks for real-time API key and secret detection on every commit.
- **Retail Optimization & Analytics:** Applied Constraint Programming techniques for intelligent shelf planning and space utilization. Developed Looker dashboards for GRN and SAMT analysis.

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, SQL

Backend Stack & Frameworks: FastAPI, Laravel

AI & Machine Learning: OpenAI APIs, Vertex AI, Google Video Intelligence, Moderation APIs

Cloud, Infrastructure & DevOps: Google Cloud Platform (GCP), Cloud Run, Cloud Functions, CI/CD, Trivy, GitLeaks

Databases: MySQL, MongoDB, Firebase / Firestore, Redis, CloudSQL

Fintech & Integrations: Stripe, Razorpay, KreditBee, CashE, Fibe, ICICI Lombard, Zoho API, Bitbucket API

EDUCATION

Bachelor of Engineering (Computer Engineering)	2018 – 2021
---	--------------------

Mumbai University

Diploma in Computer Engineering	2015 – 2018
--	--------------------

Maharashtra State Board of Technical Education (MSBTE)
